2. Insert the USB flash disk into the wireless monitor's Type-C port will the monitor enter the updating status automatically. Then just waiting for the updating completion.

2.4 Special notes:

- If the USB flash disk which over 32G, the Window/Mac system don't have the FAT32 options, so need the professional disk software tools (like DiskGenius) to format it.
- The USB flash disk needs to be formatted into the FAT32 format first can the device recognize the USB flash disk.
- The updating file need to be placed in the USB flash disk root directory can the device read the updating file, the file can't be placed in other folder.
- Checking whether the monitor firmware version is the latest or not on the device information after the update is completed.
